[Control4 Sftware Version 2.10.4](#)

The screenshot shows a Windows AutoPlay dialog box for a BD-ROM Drive (X:) containing Call of Duty: Black Ops. The dialog box has a title bar with the text "AutoPlay" and standard window controls. The main content area displays the drive name and game title, followed by a checkbox for "Always do this for software and games:" which is currently unchecked. Below this, the text "Install or run program from your media" is shown. A selection box highlights the option "Run SETUP.EXE" with the subtext "Publisher not specified". Underneath, the "General options" section shows "Open folder to view files using Windows Explorer" with an unchecked checkbox. A link at the bottom reads "View more AutoPlay options in Control Panel".

Mount the SKIDROW ISO Image on your virtual drive to install. If you dont know how to do this, I have a TUT on installing a game by mounting on a virtual drive in the Black Ops topic

There are two of them, one is receiving RTP stream via H264 and second one via MJPEG.. Change the hostname/IP address field according to your 2N IP Intercom configuration and set Authentication parameters (picture below).. As the first step search driver 2N IP Intercom in the right column in the Composer software and add to the project by double clicking on the driver.

1. [free remote control software](#)

Both of this drivers can handle the video stream from 2N IP Intercom with camera.
